RE: Need for your Response
to Division Letter of
July 19, 1983
McFarland & Hullinger
ACT/045/010
Tooele County, Utah

Gentlemen:

The Division of Oil, Gas and Mining hereby requests a written response to its July 19, 1983 registered letter. The main need expressed in that letter was to ensure that adequate soil material remained available for reclamation.

Since soil material in the alluvial fan was being removed, it became a source of Division concern. To alleviate any doubt regarding its suitability, the material was sampled and analyzed. Results indicate that it is viable material and will be useful for reclamation. Your company needs a given volume of this material to fulfill its commitments in the approved mining and reclamation plan and to receive its bond.

Indications from your office are that some potential still exists for using this material for fill. In view of this, the Division is surprised at the lack of acknowledgement of its July 19, 1983 letter. Please respond to the concerns expressed in that letter or indicate that no further disturbance will occur in this area.

The Division awaits your prompt response.

Sincerely,

THOMAS L. PORTLE
RECLAMATION SOIL SPECIALIST
